Redis streams in production

## Quiz 1 | Redis streams in production

100%

You got 2 out of 2 points. Nice!

Submitted on December 31, 10:24 am CST Graded on December 31. 10:24 am CST

- Correct!
- 1 Using the XPENDING command, we can see the value of the time-sincedelivery field for each message in the Pending Entries List. What happens to the time-since-delivery value when a consumer reads the message using XREADGROUP? Choose one answer:
  - The value remains unchanged
  - ✓ The value is reset to 0
    - The value doubles each time it is read
    - The value is deleted, since the message is removed from the Pending Entries List
  - Correct!
- 2 Which type of process can XCLAIM a pending message and reassign it to another consumer in the group? Choose one answer.
  - Only consumer processes that are members of the consumer group
  - Only the consumer that currently owns the message
  - Only the process that created the consumer group
  - ✓ Any process with a connection to the Redis server
