Redis streams consumer groups

Quiz 3 Redis streams consumer groups

100%

You got 2 out of 2 points. Nice!

Submitted on December 27, 3:40 pm CST Graded on December 27, 3:40 pm CST

CI.	Corroct	
(٧)	Correct	Į,

- 1 Redis tracks the ID of the last delivered message for each consumer group. Which of the following mechanisms is used for this? Choose one answer.
 - A queue
 - ✓ A last-delivered-id property on the group
 - The Pending Entries List (PEL)
 - A secondary stream
- Correct!
- 2 What does the ">" character mean when used with XREADGROUP?

Choose one answer.

- Read the message immediately following the last message delivered to the
- ✓ Read the message immediately following the last message delivered to the consumer group
 - Read the first message in the stream
 - Block until a new message is added to the stream
